Made With Natural Ingredients: Blending of Chemical Synthetic Ingredients with a select few Naturally-Sourced Ingredients.

The vast majority of skin care products in the marketplace unfortunately fall into this category.

Common Commercial Skin Care: 100% Chemical Synthetic Ingredients.

Organic Certification and Seals

All Our Products, Processes and Operations are Regularly Audited for Compliance With Strict Organic Standards:

Reliable Government-Backed Organic Certification To the Highest Standards:

Not only do we offer the finest range of organic skin care products in the world, but the genuine organic quality of every single product in our range is confirmed by independent 'gold standard' certification awarded by trusted government-accredited Australian and/or American certification bodies. We are confident that we have the highest and most trustworthy certified organic standards of any luxury skin care range.

Certification requires strict and detailed periodic audits of our organic farm, our manufacturing facilities and processes, and of course the products themselves.

95% of Ingredients from Organic Sources: To meet organic standards, 100% of ingredients must be from an approved natural source, with a minimum of 95% of them from true certified organic sources. Every product and ingredient must be traceable back to its organic source. All of our ingredients - extracted from a variety of plants - are grown without artificial chemical fertilizers or pesticides, and we consistently better this percentage by far in all our products. No other luxury skin care brand in the marketplace has anywhere near such a high percentage of organic ingredients.

The Only Certain Guarantee of Organic Purity and Safety: The only sure way for a person to be certain of avoiding harmful ingredients personal care products is to seek out those that are reliably certified organic. Comprehensive certification by trusted authorities gives every one of our customers independent reassurance that all Jasmin Aromatique and Koala Baby Organics products are authentic, pure, and safe to use. Our government-accredited auditors know exactly what we put in our products - and their certification gives you trust in our truly natural, pure, organic products.

This indicates that our products meet United States Department of Agriculture National Organic Program (NOP) standards for food-grade organic properties.

This seal indicates compliance with Australia's National Organic Standards and is audited by the government-accredited Organic Food-Chain (OFC).

Genuinely Organic - Luxurious Personal Beauty & Skin Care

One of the Most Safe: Jasmin & Koala Baby's purpose is to deliver the healthiest and safest skin care products for everyone. All our products are formulated using only pure and truly natural ingredients to fulfill this purpose. They are completely free of the hazardous chemicals found in many mass market products, which not only trigger skin irritation and allergic reactions, but are increasingly being implicated in a variety of more serious health conditions; as well as polluting our environment.

One of the Most Completely Organic: We are proud that Jasmin & Koala Baby are officially recognized as a world leader in genuine organic skin care. Every single product is certified organic; meaning that at least 95% of its ingredients (usually more) are from true organic sources. Unlike most skin care brands, which have very few certified organic products, we have our own organic farms, factories, and facilities - all certified organic. We process our ingredients organically without using chemicals, and both our processes and our final products are certified organic to the highest standards.

One of the Most Effective: Our products are not only safer, but they also perform better because they use higher quality natural ingredients in place of cheap chemical substitutes - natural ingredients which have been safely used for centuries and stood the test of time. Although our organic ingredients do not come cheap (they are sometimes ten times the price of synthetic ingredients, and two to three times the price of non-organic natural ingredients) we believe that you deserve only the absolute very best.

One of the Most Transparent: All our ingredients and their purposes are listed openly on our labels, with no secrets or hidden ingredients. We are regularly audited for compliance with organic standards, and we happily welcome all our customers to visit our organic farm and facilities to learn more about the brand. Our ingredients purchasing records are retained for seven years to ensure the traceability required by the organic auditing agencies.

One of the Most Environmentally Responsible: We are committed to environmental sustainability, and seek to reflect this in everything we do; from our farming techniques to our production & packaging.

One of the Most Most Caring: It is much more than just a business it reflects its founders' deep personal commitment to organic principles and the cause of natural health. Our products are more than just a set of ingredients - they exemplify natural organic goodness. And our customers are more than just a source of revenue - we are dedicated to giving them the safest and most luxurious products on the market. We will strive to ensure that our products continues to set - and raise - the bar for organic excellence in the personal care products industry.
